DIGITAL INCLUSION PROGRAM
Help a Riverside Family get a Free PC

SmartRiverside is a 501(c)(3) non-profit organization that needs your assistance. By *donating your old computer systems* (working Pentium II or greater please), you will allow low income children and senior citizens, who otherwise could not afford a computer, to receive one.

Each PC will be refurbished by SmartRiverside, given a new Microsoft Operating System, and include Microsoft Office Suite provided by a recent grant from Microsoft to the City of Riverside. Initially, PCs will be configured with modems, but by summer all donated PCs will be bundled with a free wireless access device (compliments of Smart-Riverside and donations from the community) to connect to the free city-wide wireless network being implemented by AT&T.

PCs will be donated to families with combined total income levels under $45,000 and who enroll and complete an 8-10 hour training course. SmartRiverside's goal is to get a PC to every household in Riverside within five years. Please help us achieve this goal by upgrading your systems every three years and donating your older equipment to the City of Riverside.

To coordinate a drop off or pickup (for more than 10 PCs), please contact:

Miguel Ramirez
Digital Inclusion Program Manager
digitalinclusion@riversideca.gov

Thank You

All equipment in a non-working condition will be recycled by the City of Riverside's C.U.R.E. program to keep our community clean and green.

SmartRiverside is a 501(c)(3)
